SEAL COAT GRADE ASPHALT EMULSION SPECIFICATIONS

The purpose of these specifications is to provide the Henry County Highway Department with seal coat grade emulsified liquid asphalt for the 2025 Road Maintenance Program. The intent is to secure a satisfactory performing product, from a single manufacturing source, for County road maintenance.

Material being bid shall be HFRS-2. All material shall be in accordance with 2019 State of Ohio Department of Transportation specifications and supplemental specifications. Supplier is to submit unit price bid for pick-up at the supplier's plant or delivered in tanker loads to any point in Henry County. Bidder shall provide laboratory design service and continuing laboratory, technical and professional supervision and assistance during the period of product usage. Additionally, the Engineer reserves the right to test the product via an independent testing laboratory at any time during the period of product usage. The conformance to the test limits for the product shall be continuing and test for same may be requested at any time by the Engineer. Capability of performance, as per laboratory test data, must be furnished, upon request, prior to any consideration as a source of supply.

Failure of the emulsion to perform satisfactorily when passing through the mixing or spreading equipment in the field, shall be deemed cause for rejecting, notwithstanding its ability to pass laboratory tests. Extreme variation in product uniformity, as evidenced by field usage, shall be deemed cause for termination of contract. The emulsion, after being incorporated into the work shall show no indication or re-emulsifying.

Award of bid shall be to the lowest and best bidder and shall be conditioned upon the Engineer's cost of transporting the material from the manufacturer's plant site or supply point and/or the unit price cost to supply the delivered product to any location in Henry County. Satisfactory application temperatures will be dependent upon the characteristics of the product (should be in the range of 90 degrees to 150 degrees F). Supplier must meet the ODOT specification 422 and 702.
